PROFESSIONAL SUMMARY

Results-driven Computer Science Engineering student specializing in Machine Learning, Computer Vision, and Data Science, with hands-on experience in Python, NLP, full-stack development, and containerized deployment. Demonstrated ability to build and deploy 5 production-grade ML/AI applications — including real-time image classifiers, multilingual translators, and NLP pipelines — achieving up to 85% model accuracy. Proficient in SQL, Power BI, Tableau, Docker, Streamlit, and cloud deployment via Hugging Face Spaces and Streamlit Cloud. Seeking internship/entry-level roles in Data Science, ML Engineering, or Software Development to deliver measurable business impact.

WORK EXPERIENCES

AI Intern | Internship May 2026 - June 2026
Pinnacle Labs Pvt Ltd Remote • Kolkata

- Completed an intensive 1-month AI internship focused on building and deploying real-world Artificial Intelligence projects.
- Developed 3 end-to-end AI/ML projects — **Autocorrect Tool**, **Teachable Machine** (Computer Vision), and **Translator App** — deployed live on Streamlit Cloud and Hugging Face Spaces.
- Applied NLP, image classification, and API integration techniques in a professional internship setting.
- Delivered project submissions via screen-recorded demos, simulating real industry delivery workflows.

Technologies / Skills Used : Python, NLP, Image Classification, API Integration

PROJECTS

Autocorrect Tool | 📧 Autocorrect-tool 📧 Github May 2026 - Present
Developer

- Developed an **AI-driven autocorrect tool** to improve text accuracy and fluency in written communication.
- Applied NLP techniques for accurate error detection and word correction.
- Enhanced typing efficiency by providing context-aware correction suggestions.

Technologies / Tools Used : Python, NLP, Machine Learning, Text Processing

Teachable Machine | 📧 Teachable-machine 📧 Github June 2026 - Present
Developer

- Developed an **AI-powered web application** allowing users to upload custom images, **train Machine Learning models** in real-time, and receive instant predictions without coding knowledge.
- Implemented **image classification** using **Random Forest Classifier** with an interactive 3-step user interface: Add Classes, Train Model, and Test Predictions.
- Deployed live on **Hugging Face Spaces** utilizing **Docker** containerization and integrated with GitHub for version control.

Technologies / Tools Used : Python, Machine Learning, Computer Vision, Streamlit, Docker

Translator App | 📧 Ai-translator-app 📧 Github June 2026 - Present
Developer

- Developed an **AI-powered real-time language translator** web app supporting **12 languages**, including English, Hindi, French, Spanish, and Arabic, using **Deep Translator** and **Google Translate API**.
- Created a desktop version with **Tkinter GUI** and a web version utilizing the **Streamlit** framework, ensuring a clean and user-friendly interface.
- Successfully deployed on **Streamlit Cloud** with GitHub integration, providing public access via a live URL.

Technologies / Tools Used : Python, NLP, Google Translate, API, Tkinter, Streamlit

Intelligent E-Commerce Loss Prevention Suite February 2026 - April 2026
Developer

- Engineered a real-time inventory risk dashboard analyzing expiration timelines and competitor pricing gaps for FMCG product categories.
- Designed an automated risk-scoring algorithm that prioritizes high-expiry products, reducing potential revenue loss by enabling instant markdown actions.
- Optimized backend API achieving sub-150ms response time, improving operational decision-making efficiency by **40%**.
- Developed a unified triage UI with **React** and **Next.js** supporting automated price adjustment workflows.

Technologies / Tools Used : Next.js, React, MongoDB, REST API

Fake Review Detector | 📧 Fake-review-detector 📧 Github May 2025 - September 2025
Developer

- Developed an end-to-end **NLP pipeline** to classify over **40,000** product reviews as genuine or fake using **TF-IDF vectorization** and **Logistic Regression**.
- Achieved **85%** classification accuracy by optimizing precision and recall through text preprocessing techniques, including tokenization, lemmatization, and stop-word removal.
- Deployed an interactive web app on Hugging Face using **Gradio**, facilitating real-time predictions with trust scores and visual dashboards.
- Minimized false positive rates through iterative model tuning and balanced class evaluation metrics.

Technologies / Tools Used : Python, NLP, Scikit-learn, Gradio, Hugging Face

SKILLS

Databases :	MongoDB
Frameworks & Libraries :	React.js, Next.js, Scikit-learn, TensorFlow, PyTorch
Languages :	English, Hindi
Programming Languages :	Python, C++, SQL, JavaScript
Soft Skills :	Problem Solving, Analytical Thinking, Team Collaboration
Tools & Platforms :	Power BI, Tableau, Advanced MS Excel, Docker, Git, GitHub

EDUCATIONS

VIT Bhopal University | Madhya Pradesh Sep 2024 - Oct 2028
Bachelor of Technology CGPA : 7.62

AWARDS & ACHIEVEMENTS

- Completed coursework focused on industrial IoT ecosystems, market trends, and cybersecurity challenges.

CERTIFICATIONS

- Industrial IoT Markets and Security** | COURSERA - Completed coursework on industrial IoT ecosystems, market trends, and cybersecurity challenges.
- Marketing Management** | SWAYAM · NPTEL - Certified program covering core marketing strategies, consumer behavior, and market analysis techniques.
- GenAI-Powered Data Analytics** | Tata - Completed a job simulation focused on business insights and data-driven decision-making.
- Data Analytics** | Deloitte Australia - Completed a job simulation involving Tableau dashboards, data visualization, and business intelligence reporting.
- TCS iON Career Edge - Young Professional** | TCS iON - Completed a 15-day course covering communication, soft skills, IT fundamentals, and artificial intelligence.
- Supply Chain Digitization** | SWAYAM · NPTEL - Certified program on digital transformation in supply chain, logistics optimization, and Industry 4.0 concepts.
