Summary

Results-driven Computer Science Engineering student specializing in Machine Learning, Computer Vision, and Data Science, with hands-on experience in Python, NLP, full-stack development, and containerized deployment. Demonstrated ability to build and deploy 5 production-grade ML/AI applications — including real-time image classifiers, multilingual translators, and NLP pipelines — achieving up to 85% model accuracy. Proficient in SQL, Power BI, Tableau, Docker, Streamlit, and cloud deployment via Hugging Face Spaces and Streamlit Cloud. Seeking internship/entry-level roles in Data Science, ML Engineering, or Software Development to deliver measurable business impact.

Skills

Programming & Querying: Python, C++, SQL, JavaScript

Data Visualization Tools: Power BI, Tableau, Advanced MS Excel

Machine Learning & AI: Scikit-learn, NLP, TF-IDF, Logistic Regression, Supervised Learning, Model Deployment, Computer Vision, Image Classification, Random Forest

Web Development: React.js, Next.js, MongoDB, REST APIs, Gradio

Data Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Descriptive Statistics, Feature Engineering

Cloud & Deployment: Hugging Face Spaces, Streamlit Cloud, Docker, Git, GitHub

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration

Deep Learning (Learning): PyTorch, TensorFlow

Experience

AI Intern — Pinnacle Labs Pvt Ltd *(Remote, Kolkata)*

May 2026 – June 2026

- Completed an intensive 1-month AI internship focused on building and deploying real-world Artificial Intelligence projects.
- Developed 3 end-to-end AI/ML projects — Autocorrect Tool, Teachable Machine (Computer Vision), and Translator App — deployed live on Streamlit Cloud and Hugging Face Spaces.
- Applied NLP, image classification, and API integration techniques in a professional internship setting.
- Delivered project submissions via screen-recorded demos, simulating real industry delivery workflows.

Projects

Fake Review Detector | Python, NLP, Scikit-learn, Gradio, Hugging Face

July 2025 – September 2025

DEMO - <https://huggingface.co/spaces/Kunjeshm03/fake-review-detector>

- Built an end-to-end NLP pipeline to classify 40,000+ product reviews as genuine or fake using TF-IDF vectorization and Logistic Regression.
- Achieved 85% classification accuracy with optimized precision and recall through text preprocessing (tokenization, lemmatization, stop-word removal).
- Deployed a production-ready interactive web app on Hugging Face using Gradio, enabling real-time predictions with trust scores and visual dashboards.
- Reduced false positive rate through iterative model tuning and balanced class evaluation metrics.

Intelligent E-Commerce Loss Prevention Suite | Next.js, React, MongoDB, REST API

February 2026 – April 2026

- Engineered a real-time inventory risk dashboard analyzing expiration timelines and competitor pricing gaps for FMCG product categories.
- Designed an automated risk-scoring algorithm that prioritizes high-expiry products, reducing potential revenue loss by enabling instant markdown actions.
- Optimized backend API achieving sub-150ms response time, improving operational decision-making efficiency by 40%.
- Developed a unified triage UI with React and Next.js supporting automated price adjustment workflows.

DEMO – <https://autocorrect-tool-9iyfqr7nbgmzsq48hzxv.streamlit.app>

- Developed an AI-driven autocorrect tool to improve text accuracy and fluency in written communication.
- Applied Natural Language Processing (NLP) techniques for error detection and word correction.
- Enhanced typing efficiency by suggesting context-aware corrections.

Teachable Machine | Python, Machine Learning ,Computer Vision, Streamlit, Docker, Hugging Face Spaces**JUNE 2026****DEMO - <https://huggingface.co/spaces/Kunjeshm03/teachable-machine>**

- Built an AI-powered web app where users can upload custom images, train a Machine Learning model in real-time, and get instant predictions without any coding knowledge
- Implemented image classification using Random Forest Classifier with an interactive 3-step UI — Add Classes, Train Model, and Test Predictions
- Deployed live on Hugging Face Spaces using Docker containerization with GitHub integration for version control

Translator App | Python, NLP, Google Translate, API, Streamlit, Tkinter, Streamlit Cloud**DEMO – <https://ai-translator-app-sfhfjezskuspwwvmkotiz.streamlit.app>**

- Built an AI-powered real-time language translator web app supporting 12 languages including English, Hindi, French, Spanish, Arabic, and more using Deep Translator and Google Translate API
- Developed both a Desktop version using Tkinter GUI and a Web version using Streamlit framework with clean and user-friendly interface
- Deployed live on Streamlit Cloud with GitHub integration, making it publicly accessible to anyone via a live URL

Awards & Certifications

- Industrial IoT Markets and Security — COURSERA ~ United Latino Student Association (Completed coursework focused on industrial IoT ecosystems, market trends, and cybersecurity challenges)
- Marketing Management — SWAYAM · NPTEL (Certified program covering core marketing strategies, consumer behavior, and market analysis techniques)
- Tata – Completed a GenAI-powered data analytics job simulation focused on business insights and data-driven decision-making.
- Deloitte Australia – Completed a data analytics job simulation involving Tableau dashboards, data visualization, and business intelligence reporting.
- TCS iON Career Edge — Young Professional | TCS iON Completed 15-day course covering Communication, Soft Skills, IT Fundamentals, and Artificial Intelligence
- Supply Chain Digitization | SWAYAM · NPTEL Certified program covering digital transformation in supply chain, logistics optimization, and Industry 4.0 concepts

Education

Bachelor of Technology: Computer Science Engineering

Expected in 10/2028

VIT Bhopal University – Madhya Pradesh
